

New fine-tuning possibilities.

The Corner bass trap is the latest in low frequency absorption. This elegant panel integrates a tuneable membrane over a sealed volume, containing a high performance acoustic core. A secondary compartment positions Helmholtz resonators in the high pressure zone of the room. The panel is completely tuneable, by means of an adjustable weighted membrane, allowing to pin-point the performance of the panel to a target frequency.

The panels' tuneable membrane works in a similar way to a speaker cone, allowing for a much superior - and controlled - performance. A central mass is supported by an elastic membrane - This mass can then be altered to change the resonant frequency of the membrane, stepping the peak performance of the Trap from 58 to 82 Hz.

**Performance**

**Technical Information**

**Features**

Type:

Tuneable weighted diafragmatic membrane

Tuneable absorption range: 58Hz to 82Hz.

Tuneable weighted diafragmatic membrane

Hz-by-Hz fine tuning

New fine-tuning possibilities.

Material:

Natural Wood veneer | Lacquered HMDF

Solid Wood

Marine grade plywood structural frame

Calibrated cell acoustic foam

This panels can only be installed on vertical wall corners. Not for ceiling use.

Dimensions:

FG - LW | 595x595x163mm

FG - NW | 595x595x163mm

**Purpose**

- Room mode control
- Bass ratio control
- Low frequency RT reduction
- Improving low frequency response
- Reducing low frequency time decay

**1** Select the weight layout to tune the bass trap to your desired frequency range.

**2** Clip the front of the panel in to the bass trap body, leaving easy access to the membrane.

**Recommended for**

- Hi-Fi Listening Room
- Media Room
- Home Cinema
- Living Room

**Corner Bass Trap performance**

**Fixing System**

Integrated fixing system

Kit Mobile Wall
